Project description-

During my time at Infosys, I was part of E-commerce Application from May 2023 to October 2023.This platform helps you to purchase the products, services online by selecting product on website. The proposed agreements require creation of market place via internet connection for purchase, delivery or online sale of products. Consumers can select various products and various brands depending upon categories, there are multiple delivery options are available.

Roles And Responsibilities:
- Design UI with web technologies provided by UX team.
- Working as Angular Developer.
- Improvement of performance.
- Involved in enhancement, Maintenance and application development and support.
- Handling development activities
- Environment: Windows, Angular 13, HTML, CSS

Project 2
Team Size: 4

Domain: - Travelling

Project description-

This a travel search engine website. And since it's a search engine, it's a great place to start.
The site compares prices from many different websites all in a single spot so you can easily see where the cheapest options are. Most of the time, you'll end up clicking through to a different site to complete your booking. Kayak Hacker Fares are a great way to save money on your flight. These can be pretty good deals, and something that doesn't always appear in search results of other websites.

Roles And Responsibilities:
- Discuss and clarify requirements provided by the Product Manager.
- Design the Solution with Web Services.
- Used Angular Directives like ngModel, ngFor, ngClass, ngIf, hidden, etc.
- Developed the project's web page as Single Page Application (SPA) by using Angular.
